Cooling Services

Environmental Policy Statement

It is SJB Cooling Services intention to promote sound environmental management policies and practices. By exercising proper control over its activities the company aims to achieve the following key objectives;

- To only use operational personnel that are ACRIB registered in the safe handling of refrigerants and to carry out works in accordance with FGAS regulations, so as to reduce the release of ozone depleting substances, greenhouse gases and other substances damaging to health and the environment.
- Give timely consideration to identifying, acquiring and/or developing any skills, equipment, processes, control systems or other resources to achieve the required environmental performance.
- To conserve energy by diligently maintaining customer equipment, to suggest practical modifications and upgrades to equipment, controls and external influences, and where commercially viable the replacement of equipment with new technologies that offer greater energy efficiency.
- To only select and install energy efficient equipment that operates at optimum performance with minimal environmental impact.
- To minimise waste production as far as is practicable, to reuse or recycle waste where possible and to use companies with sound environmental policies for the treatment and disposal of any residual waste.
- To encourage the phase out of ozone depleting substances by offering alternative environmentally friendly solutions.
- To recognise that the company has a legal and moral responsibility with regard to the environment and therefore take every opportunity to protect and nurture the environment.
